

NOTES

1. The potential flooding consequences shown on this map relate to flooding from the sea, main rivers and Internal Drainage Board systems taking into account the presence of current flood risk management measures such as flood defences.
2. In addition to the potential flood extents shown on this map, there may be shallow flooding in low-lying rural areas
3. The consequences designated as being a Residual Risk arise from direct overtopping of defences, where this would occur, together with breach failure which is assumed could occur at any point along the defences.
4. Functional Floodplain encompasses areas where water is intended to flow or be stored in times of flood.
5. Land outside South Holland District is not considered.
6. This map shows the extents only of the flooding probability bands relevant to the map Title
